SKILLS

HTML Jave SE CSS MySQL JavaScript SpringBoot Framework BootStrap
jQuery VCS with Git Object Oriented Paired Programming Thymeleaf Jave EE
WordPress Joomla Unity

DEVELOPMENT PROJECTS

Java Adlister 2020

Used Java to dynamically generate html pages and a java database connection to communicate with a MySQL Database. Implemented Model-View-Controller design pattern. Contains CRUD functionality and replicates the core purpose of craigslist.com.

ChatApp 2020

Developed through Spring Boot that uses a branch of the WebSocket called STOMP (Streaming Text Oriented Messaging Protocol) and HTTP Handshake to establish a two way messaging protocol. HTTP Handshake is used to communicates to the server that it is not HTTP and to upgrade to the WebSocket and then will be able to form a connection. Not all browsers support WebSocket protocol so SockJS will be implemented as a fallback.

Coder Collective 2019

A site built in Thymeleaf and Spring Boot Framework. Contains CRUD Functionality. Implemented an API that allows for Google Authentication to generate a user profile and interacts with a MySQL database.

Weather Map 2019

With the DarkSky API, I created a 3 day weather forecast. Displays various information, like, temperature, humidity and weather conditions. Application updates map, weather to any desired location.

PROFESSIONAL EXPERIENCE

Penguin Suits Advertising Agency 2020

Web Developer

Developed, designed, managed and maintained websites for multiple clients through content management systems like WordPress and Joomla
